

# EELS AND LADDERS

All eels must STOP. To continue roll 3 or 4 and use the eel ladder up to 26. Good luck!

Believe it or not, but eels are actually a type of fish! At their largest, they can reach up to 1.5m long, weigh 5kg and live for 85 years!

Only 4000 miles to the Sargasso Sea. Good luck!

Eels are famous for their 4,000 mile journey from where they're born in the Sargasso sea (in the North Atlantic) to Europe and then their return journey as adults back to lay their eggs (spawn). But there are still many mysteries about this journey. No adult eels have ever been caught in the open ocean, so we have no idea how long it takes for them to reach their spawning grounds or how many of the eels that leave Europe make it back to the Sargasso Sea. They are a very slippery customers indeed!
